Specialty socks for diabetics are made to stay in place without being constrictive or increasing compression on the foot or ankle. Sock measurements for compression are described in “mills”. Standard socks are constructed 10-12 mills mercury. Diabetic socks need toe seams that are either non-existent or minimized to reduce the possibility of cutting in to the skin.

Sock cost is \$5 per pair. The suggested retail price is \$10 per pair.

- 85% cotton 15% nylon
- Low Compression, 3 4 or 6 mills
- Minimized Toe Seams
- Nylon Exterior Reduces Friction
- Resilient, easy to clean fibers
- Machine Wash and Dry
- Liquid Softeners Increase Wear-ability
- Do Not Bleach

Dress Socks

Available in both white and black

Mid-calf Crew Style

Nonrestrictive — Non-Ribbed Top - Completely Seamless Toe Area

A flat-knit sock with full heel and toe.

Thin, lightweight cotton interior, nylon exterior to help reduce frictional forces encountered within a shoe.

Compression 6 Mills

Edema Socks

Available in both white and black

Nonrestrictive Non-Ribbed Top, Completely Seamless Toe Area

A flat-knit sock with full heel and toe.

Oversize for larger individuals or those with severe edema.

Thin, lightweight cotton interior, nylon exterior to help reduce frictional forces encountered within a shoe.

Available in Mid-calf Crew Style

Compression 3 Mills

Athletic Socks

Available in both white and black

Non-restrictive top extends to mid-calf

Natural color made of unbleached cotton as prescribed by doctors.

Full cushion lining for easy walking.

Low profile seam in the toe area to reduce irritation. Each sock goes through a special process to create a nice, flat seam.

Reversible - Either the cushion side or the smooth side can be worn next to the skin.

Sock Display Rack: This compact unit can save space and increase your sales. The rack holds 36 pairs of socks available in Dress, Athletic and Edema product selections.
